Main Contact Person (if different from principal) _____

Email of Main Contact _____

Principal's signature _____

Principal's name _____

Principal's email _____

Date _____

Terms and Conditions of Service

- Schools are charged a fixed cost per academic year (March to December), per student registered on Brightpath. Pre-primary or Kindergarten students are not charged for. Unless Brightpath is advised differently, schools will be re-invoiced at the start of each subsequent Academic year.
- Schools are charged a \$75 flat fee for school data upload into the Brightpath App.
- The licence grants unlimited access to the selected Brightpath software package selected. During the period of licence, schools are at liberty to use the scales related to those learning areas and may implement as many assessment tasks as they wish. (There are pedagogical considerations in determining the frequency of implementing the assessments.)
- Students added to the site during the year are charged at the full-year's fixed cost (there is no pro-rata provision for additional students, and no refund for students who are removed part way through the year).
- Schools should be aware that, prior to the start of the academic year, before the new school data is uploaded, there will be a short period when parts of the software will be inaccessible. There may also be periods required for reasonable scheduled maintenance and updates.
- The power of 'whole school' data is greatly enhanced if the entire school works with Brightpath. However, some non-WA schools choose to apply Brightpath only to certain year groups.
- In adopting its pricing policy, Brightpath has made every effort to make this educational turning point available to as many schools and students as possible.
- Invoices will be issued to the School. Payment terms are 14 days.
